DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species: at least five species identified as:

- (1) Figure 4;
- (2) Figure 5;
- (3) Figure 6;
- (4) Figure 7;
- (5) Figure 8;

The species are independent or distinct because inventions 1-5 are directed to related processes. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode or operation, function, or effect. See MPEP § 806.05(j). In the instant case, the invention discloses five embodiments directed to methods for conducting electronic transactions. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.

Art Unit: 3692

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 28 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
